

North America's most advanced provider of custom data intelligence solutions to drive your business forward.

Our technologies protect Government and Enterprise against the risk of data loss due to unauthorized system access and privacy non-compliance.

The Problem

There's not a good solution for PIV and CAC that eliminates the need for an external card reader, validates the identity of mobile users, and also exceeds NIST and DISA security standards... until now.

The Solution: **#DerivID**

SECURE PROCESSES AND TECHNOLOGY

- Architected based on NIST SP 800-157.
- Patent Pending High Security Smart Card technology that eliminates the possibility of brute force attacks – including dictionary attacks.
- Configurable user re-authentication triggers and credential validity periods.
- Enables the detection and prevention of multiple sign-in attempts.

EXCELLENT USABILITY

- Android and iOS-compatible.
- Support for both multiple user credentials per mobile device and multiple user devices.
- Supports native, MDM/EMM and custom Apps, with APIs available for mobile App development.
- Operates in both online and offline mode.
- Self-service: no security officer required to facilitate issuance of derived credentials.

SEAMLESS DEPLOYMENT

- Eliminates the need for an external reader currently required to authenticate with a CAC or PIV card.
- Deploys and scales simply and seamlessly.
- Integrates with leading MDM and EMM providers.
- Accredited infrastructures already deployed and available to both DOD and civilian government.
- Level of Assurance 3 (LOA3).

FLEXIBLE SOLUTION

- Automated credential lifecycle management.
- Designed to integrate with existing Certificate Authorities on the Federal Bridge.
- Actively functions with multiple Certificate Authorities.
- More cost-effective than other derived credentials technologies.

How DerivID Works

When security means everything DerivID is the ideal solution for validating the identity of government employees, active duty personnel, and contractors who need to access networks, utilize applications, digitally sign documents, and more. Part of the Routel suite of patented security solutions, DerivID leverages deployed and fully accredited infrastructures (DEFIMNET for Government).

Who We Work With

Routel works with many in Government and Enterprise including the Pentagon and the Military.
